Sometimes all it takes is a small spark: clothing that has caught fire harbours a high risk of injury for the wearer. It therefore makes sense in certain areas to wear safety clothing that prevents the spread of flames. Our flame-retardant **PREVENT® Trendline high-visibility waistcoat PTW-WFR** is designed for just such applications. It is flame-retardant so that it does not start to burn on brief contact with small flames or sparks. Certified to EN 20471 Class 2 and EN ISO 14116 Index 1, the waistcoat must be worn over Index 2 or 3 clothing to provide flame-retardant protection. The waistcoat shines in eye-catching orange or neon yellow and is equipped with reflective strips on the shoulders and body. These features bring it up to high-visibility class 2, making it perfect for anyone who needs to be clearly visible at work. In addition, the integrated carbon fibres prevent the build-up of electrostatic charge and give the high-visibility waistcoat permanent antistatic properties.

RELIABLE

Thanks to its flame-retardant coating and anti-static properties, our high-visibility waistcoat offers special protection in environments where thermal hazards lurk.

COMFORTABLE

Lightweight and comfortable - just right for working in high temperatures. Our waistcoat is not only comfortable, but can also be fastened quickly and easily with its practical Velcro fastener.

WIDE RANGE OF SIZES

Choosing the right size is important when using protective workwear. It increases both wearing comfort and work safety. That's why you can choose between numerous sizes from S - 4XL for our high-visibility waistcoats.

EXAMPLES OF USE

Outdoor work, work in poor lighting conditions, work with thermal hazards, road work, work with industrial trucks, instructing vehicles, repair, towing and recovery work.
