Our Multinorm parka is a real powerhouse that perfectly combines safety and comfort - ideal for use in extreme conditions. Made from hard-wearing polyester and with woven-in carbon fibre, it provides effective protection against electrostatic charge, flames and moisture. The removable inner jacket offers additional warmth and flexibility.

Despite the robust protection, the Multinorm parka is extremely comfortable to wear, ideal for long working days. A must for professionals who don't want to compromise on protection in challenging environments. *

VERSATILE PROTECTION

The Multinorm parka offers limited protection against liquid chemicals, protection against electrostatic charge and flame protection. It is therefore ideal for professionals working in environments where multiple risks exist simultaneously and protection is required on many levels.

HIGHLY FUNCTIONAL DESIGN

The Multinorm parka is equipped with a detachable fleece inner jacket, reflective strips for increased visibility and taped seams that repel moisture. The concealed 2-way front zip provides additional protection against wind and rain. Practical details include a roll-up and detachable hood with drawstring and numerous pockets, all of which can be securely fastened. The sleeve width adjustment allows for a customised fit.

WEATHER PROTECTION

The high-quality workmanship and additional taped seams make the Multinorm parka the ideal companion, especially in harsh environments. It offers protection against rain and cold thanks to thermal insulation and maximum class 3 waterproofness.

APPLICATION EXAMPLES

Extremely versatile and powerful, ideal for use in the chemical industry, construction, logistics and wherever protection against electrostatic charge, flames and chemicals is required.

WIDE RANGE OF SIZES

The Multinorm parka is available in blue and grey in a wide range of sizes to ensure an optimum fit. The adjustment options on the sleeves and waist ensure that it can be perfectly adapted to the body shape. It is available in sizes S - 5XL.
