

Fine knit glove with HPT coating, touchscreen function & hygiene equipment

Art. HIT200

HPT (palm-dipped), Anti Wet

Hygiene Plus – Sanitized®

Touchscreen capable

Touch function

Breathable back

High abrasion resistance

Skin-friendly: OEKO-TEX® Standard 100 & Sanitized®

Seamless knit carrier with Sorona® content

HPT palm coating (palm-dipped), Anti Wet

Elastic knit cuff

EN 388:2016
+A1:2018

Access securely. Capture digitally. Without interruption.

The HIT200 offers reliable grip through a HPT palm coating, even in wet, oily environments. The fine knit carrier fits snugly, while the uncoated back of hand supports breathability over long wear times. Touch zones on the index finger and thumb allow scanning, typing, and documenting without changing gloves – processes in production and storage remain uninterrupted. The Sanitized® equipment inhibits the growth of odor-causing bacteria and fungi, and OEKO-TEX® Standard 100 ensures additional material compatibility. Result: reliable performance, fewer changes, predictable quality.

HIGH ABRASION RESISTANCE

When every layer counts: The HPT coating and reinforced thumb joint withstand friction and contact surfaces. This combination makes the glove particularly durable, even under wet working conditions. According to EN 388 – Abrasion Level 3, the HIT200 remains usable for longer – for fewer changes and consistently good results.

APPLICATION EXAMPLES

Extremely versatile and powerful, ideal for industries such as construction, sanitation, automotive, shipping & receiving, warehousing, or for general mechanical applications.

TOUCH FUNCTION FOR DIGITAL WORK-FLOWS

The index finger and thumb are touch-screen-capable – allowing for scanning, typing, and documenting without changing gloves. This speeds up processes in production and storage and reduces interruptions while keeping hands protected. The fine-knit carrier ensures precise work, and the elastic cuff fits securely even with frequent putting on and taking off.

WIDE RANGE OF SIZES

The HIT-200 is available in various sizes from 6-12 to ensure an optimal fit. It covers a wide spectrum – from delicate assembly to heavy handling. The fine size gradation ensures a secure fit without slipping, supports precise work, and remains comfortable even over long shifts.

ESPECIALLY HYGIENIC

The integrated Sanitized® treatment inhibits the growth of odor-causing bacteria and fungi on the material. This keeps the glove fresher for longer – even during long shifts and in warmer environments. Ideal for demanding work areas where comfort and hygiene matter.

SPECIFICATIONS – HIT200

- PPE category: II
- Coating material: HPT (microfoam), anti-wet
- Base material: Polyamide/spandex/ Sorona® (fine knit)
- Colour: liner salt and pepper, coating black
- Sizes: 6–12
- Packaging unit: 12 pairs, PU 120 pairs
