The **LAG2 painting suit** is the professional model among the painting suits. The high-end reusable solution for painters and varnishers reliably accompanies its wearer day after day. The special carbon fibres permanently preserve its antistatic properties. They survive even the most intensive use and remain unchanged after every cleaning. Lint-free and very tear-resistant, the LAG2 is particularly durable.

RELIABLY ANTISTATIC

The woven carbon fibres make the LAG2 permanently antistatic - even after every wash. The permanent dissipative capacity makes it particularly attractive in environments with explosion risk and when handling sensitive components.

APPLICATION EXAMPLES

Dealing with paints and dirt, spraying work, disposal of contaminated sites, insect control, painting work

DURABLE AND BREATHABLE

The material composition and design ensure a long service life as well as a very good fit. Breathable, it also makes physically demanding work easier.

AREAS OF APPLICATION

Paint shops, painters, workshop, automotive industry, renovation companies; waste disposal companies, agriculture

WIDE RANGE OF SIZES

The right choice of size is important when using reusable protective suits. It increases both wearing comfort and occupational safety. The LAG2 is available in numerous sizes from S - 3XL. Other special sizes are also available on request.

SPECIFICATIONS

PPE category II
