The flame-retardant **PREVENT® high-visibility jacket PJO-FR** and the flame-retardant **PREVENT® high-visibility trousers PHO-FR** are ideal companion in critical environments with thermal hazards and in unfavourable light conditions, either in combination or individually. Thanks to the fluorescent orange outer material and reflective stripes on the torso, sleeves and legs, the jacket has the highest high-visibility class 3 and the trousers high-visibility class 2. Welded seams make both windproof and waterproof and the antistatic finish provides additional safety.

FIÁVEL

O revestimento retardador de chama e o acabamento anti-estático conferem segurança mesmo em ambientes com perigos térmicos, risco de explosão e no manuseamento de componentes sensíveis.

APPLICATION EXAMPLES

Outdoor work, work in poor lighting conditions, work with thermal hazards, road work, work with industrial trucks, instructing vehicles, repair, towing and recovery work, work on tracks and in track areas, port work, water management work.

WIND- AND WATERPROOF

The high-quality workmanship and additionally taped seams make the high-visibility jacket and high-visibility trousers windproof and waterproof. This makes them ideal workwear, especially in harsh environments.

AREAS OF APPLICATION

Road construction companies, welding shops, industry, airports, construction sites, municipalities, waste collection

WIDE RANGE OF SIZES

The right choice of size is important when using protective workwear. It increases both comfort and safety at work. The PJO-FR and PHO-FR are available in numerous sizes from S - 5XL. Other special sizes are also available on request.
