

COVER Star THE CLASSIC

Art. CS500

Sophisticated, functional design for optimum wearing comfort

CoverStar® high quality microporous film laminate

Antistatic finish

Glued-in instead of sewn-in back elastic for a better barrier and optimal fit

Practical 2 way zip

Also available in blue and green

3-part hood, flexible with head movements for a free field of vision.

Elasticated cord for optimum adjustment and closure of the hood to masks or goggles

Double-layered zip cover with 3-point adhesive strip for secure hold

Highly visible informative chest logo

Self-stopping zip, prevents unintentional opening

Arm and leg elastic for optimal closure to gloves and boots

Finger loops prevent the risk of sleeves riding up

PPE Category III
EN ISO 13982-1:2004+A1:2010
EN 13034:2005+A1:2009
EN 1073-2:2002
EN 14126:2003+AC:2004
EN 1149-5:2018
EN 369
ISO 14644

Typ 5B + 6B
Protection against solid particulates (particle tight)
Protective clothing against liquid chemicals (partially splash-tight)
Protection against particulate radioactive contamination
Protection against infectious agents in blood and viruses
Electrostatic properties
Protection against oils and lubricants
classes ISO-7, ISO-8, ISO-9; suitable for clean rooms

COVER
Star

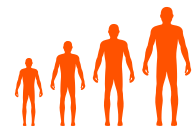

Our versatile classic has been continuously developed and improved. **The result:** the ideal combination of reliable barrier, mechanical strength and comfort. As versatile as the CoverStar® is, so are the possible applications. Wherever people, production processes or products have to be protected against contamination from contamination, it is your optimal protective suit.*

A special finish makes the barrier material antistatic. The extremely smooth surface of the outer side supports the easy beading of liquids and reduces the adhesion of particles. This significantly reduces the of cross-contamination.

„Reliable protection against biological hazardous substances and organisms is becoming increasingly important. Especially in infection control, the excellent barrier performance of CoverStar® suit material against bacteria, blood and viruses is crucial and enables quiet safe working.“

Choosing the right size is crucial when using protective suits. Both comfort and safety are enhanced by the right size selection. That is why the CoverStar® comes in many selectable sizes: Available in 9 sizes from XS - 5XL, other special sizes are also available on request.

„In contrast to many other protective suits, CoverStar® provides reliable protection when working with oil and grease.“

Extensive accessories: jacket, gown, trousers, hood, apron, arm cuff, overshoes, overshoe boots, paint spray gun cover and wheel cover.

Areas of application: Extremely versatile and powerful in infection control, crafts, production, municipalities, trade and the entire industry.

* Through professional risk-hazard analysis, the appropriate performance requirements and type classes must be identified in order to determine the correct protective suit for the respective application. We will be happy to advise you on the selection.
